DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of claims 1-2, in Paper No. 4, is acknowledged.

Drawings

2. The drawings are objected to under 37 CFR 1.83(a). They are informal. Formal drawings will be required when the application is allowed.

Specification

3. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.
4. The specification is objected to as containing minor errors in grammar, for example, on page 7, line 3, "are" should be deleted.
5. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Claim Rejections - 35 USC § 112

6. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

7. Claims 1-2 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

Specifically, it is not clear which elements of Figure 1A correspond to which limitations of the claims. At present, the connectivity shown in Figure 1A and described on page 6 of the specification does not appear to be the same as what is claimed.

Detailed explanation of where each limitation of the claims is shown Figure 1A is required to overcome this rejection.

Claim Rejections - 35 USC § 102

8. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 2186

9. Claims 1-2 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Bacon et al., U.S. 5,440,632.

As for claim 1, Bacon et al. teach computer system comprising:

- a memory controller (*control microprocessor 128*);
- a main memory bus (*memory bus 141*) coupled to the memory controller;
- and a synchronous non-volatile memory device (*Flash EPROM 134*) coupled to the main memory bus.

As for claim 2, note e.g. Figure 5, wherein Bacon et al. teach the non-volatile memory having a command interface (*multifunction control circuit 104*) comprising:

- a write enable connection (*WE*);
- a column address strobe connection (*CAS*), for column address strobe signals;
- a row address strobe connection (*RAS*), to receive a row address strobe signals; and
- a chip select connection (*ACS*) to receive a chip select signal.
